Education

Ph.D. Psychology, Stanford University, Fall 2015-Present

- Advisor: James L. McClelland.
- Area: Cognitive.
- Center for Mind, Brain, and Computation Trainee (Co-Mentor: Surya Ganguli).

B.A. Mathematics, Physics, UC Berkeley, May 2014

- Highest honors in mathematics, high distinction in general scholarship.
- GPA: 4.0 Math, 3.9 Physics, 3.9 cumulative.
- Study Abroad Internship, A*STAR IHPC Singapore, Summer 2012. (See Research Experience.)

Honors

National Science Foundation Graduate Research Fellowship, Fall 2015-Present
Percy Lionel Davis Award for Excellence in Scholarship in Mathematics, May 2014
Berkeley Physics Olsen Scholar 2013-2014
Berkeley Letters & Science Dean's List 2012-2014
Berkeley Physics Undergraduate Research Scholar, Spring & Fall 2012

Research Experience

PhD Candidate, Stanford University Department of Psychology, August 2015 - Present

- Empirical and theoretical investigations of the effects of multiple tasks in deep learning.
- Research on a variety of approaches for reducing the quantity of data required to train a deep learning system.
- Research on curriculum learning in neural networks.
- Experiments to investigate the effects of presentations of concepts on learning of related concepts in mathematical cognition.

PhD Software Engineering Intern, Google Brain, June 2017 - September 2017

- Designed and developed a system for using low-quality data from human interactions to improve an adversarially trained image generative model.
- Contributed gradients to TensorFlow image resizing ops.

Associate Professional Staff I, Johns Hopkins University Applied Physics Laboratory, June 2014 - July 2015

- Worked on image classification using convolutional neural networks.
- Developed models and simulations of sensor systems, shipping and transportation, and autoimmune diseases.
- Devised metrics for assessing sensors.
- Worked on methods for classifying software as malicious based on features of its performance.

Student Research Associate, Lawrence Berkeley National Laboratories, January - May 2012 & August - December 2012

- Developed simulations of processes in nuclear physics.
- Engineered software and hardware for efficiently collecting & analyzing data.

Summer Research Intern, A*STAR Institute of High Performance Computing, Singapore, June - August 2012

- Wrote and adapted simulations of crystallization processes in super-cooled metals.
- Developed software for analyzing and visualizing the structure of crystals.

Research Assistant, UC Davis Plant Sciences, June - August 2011

- Developed procedures and software for testing the physical attributes of fruit.

Publications

Two presentations of a mathematical system: complementary advantages that can be combined, Andrew K. Lampinen and James L. McClelland, (in press), *Journal of Educational Psychology*

Building on prior knowledge without building it in, Steven S. Hansen, Andrew K. Lampinen, Gaurav Suri, and James L. McClelland, (in press), *Behavioral & Brain Sciences*

Improving the replicability of Psychological Science through pedagogy, Robert X. D. Hawkins, Eric N. Smith, Carolyn Au, Juan Miguel Arias, Rhia Catapano, Eric Hermann, Martin Keil, Andrew Lampinen, Sarah Raposo, Jesse Reynolds, Shima Salehi, Justin Salloum, Jed Tan, and Michael C. Frank, (in press), *Advances in Methods and Practices in Psychological Science*

Improving image generative models with human interactions, Andrew Kyle Lampinen, David So, Douglas Eck, and Fred Bertsch (2017), *arXiv*

Analogies emerge from learning dynamics in neural networks, Andrew Lampinen, Shaw Hsu, and James L. McClelland, (2017), *Proceedings of the 39th Annual Meeting of the Cognitive Science Society*

Invited Talks

The Jabberwocky: One-shot and few-shot learning of word embeddings, Meaning in Context Workshop, Center for the Study of Language and Information, Stanford University, September 12th 2017

Presentations

Fast and sparse learning with compositional concept training, 15th Neural Computation and Psychology Workshop, August 2016

Cherenkov Radiation Based False Positive Detection for Rare Decays, Berkeley Undergraduate Physics Spring Poster Session, May 2012

Teaching Experience

Teaching Assistant, Stanford University Department of Psychology, Fall 2016 & Winter 2017

- Planned and taught discussion sections for undergraduate introduction to statistics courses and graduate research statistics course.
- Held office hours.

Undergraduate Student Instructor, UC Berkeley Mathematics, Spring, Fall 2013, & Spring 2014

- Planned and taught discussion sections.
- Held office hours.
- Wrote and graded quizzes and midterms.

Teaching Assistant, UC Berkeley Early Academic Outreach Program, June-July 2013

- Held office hours.
- Substitute taught classes.

Other Work Experience

Statistics Consultant, Stanford University Department of Psychology, Fall 2016-Spring 2017

- Advised graduate students on technical aspects of data collection and data analysis.

Technical Skills

Computer science: Experienced with both theory and practice.

- Graduate coursework in machine learning, neural networks, and probabilistic models & algorithms.
- Experienced user of Python, R C++, C, Matlab, some knowledge of Mathematica, Macaulay2, Haskell.
- Used many common libraries for these languages, e.g. numpy, scipy, matplotlib, Matlab Computer Vision Toolbox, FFTW.
- Used many machine learning libraries, including TensorFlow, Torch, Matlab Machine Learning Toolbox, and Caffe.
- Experienced with *NIX operating systems.

Mathematics: Knowledge across many domains, with applications.

- Algebraic geometry, group theory, category theory, etc.
- Practical applications to machine learning, computer vision, neural coding, etc.

Statistics: Significant experience with standard data analysis techniques.

- Linear modeling, hierarchical modeling, etc.
- Fitting algorithms & goodness-of-fit tests.

Physics: Experienced in a wide variety of applied and experimental contexts.

- Statistical mechanics, biophysics, analytic mechanics, etc.
- Experimentation ranging from NMR to quantum entanglement.

Modeling & Simulation: Developed models and simulations for a variety of phenomena

- Developed both from published methods and directly from physical principles.

Other Activities

Carillon: Carillonneur member of the Guild of Carillonneurs in North America (www.gcna.org).

Rock climbing: Bouldering, top rope, and sport.
